

California Advancing and Innovating Medi-Cal (CalAIM) Community Supports Fact Sheet

Background

The Whole Person Care (WPC) pilots and Health Homes Program (HHP) built a foundation for an integrated approach to coordinating medical care, behavioral health and social services to improve beneficiary health outcomes. Consistent with the CalAIM objective of reducing variation and complexity across the delivery system, as well as identifying and managing member risk and need, establishing coverage of a set of Community Supports will make a statewide offering of these critical interventions for Medi-Cal beneficiaries.

The Department of Health Care Services (DHCS) is proposing to implement Community Supports, which are flexible wrap-around services that a Medi-Cal managed care plan will integrate into its population health strategy. These services are provided as a substitute to, or to avoid, other covered services, such as a hospital or skilled nursing facility admission or a discharge delay.

According to federal Medicaid program rules, Community Supports are medically appropriate and cost-effective alternatives to services that can be covered under the State Plan. They are typically delivered by a different provider or in a different setting than traditional State Plan services. Community Supports can only be covered if:

- The state determines that the service is a medically appropriate and cost-effective substitute or setting for the State Plan service;
- The services are optional for the managed care plan to provide;
- The services are optional for members, and they are not required to use the Community Supports; and
- The Community Supports are authorized and identified in the state's Medi-Cal managed care plan (MCP) contracts.

MCPs will develop a network of providers that have the expertise and capacity regarding specific types of services.

DHCS is proposing to include the following 14 distinct services as Community Supports under Medi-Cal managed care. Each service will have defined eligible populations, code sets, potential providers, restrictions and limitations:

- Housing Transition Navigation Services
- Housing Deposits
- Housing Tenancy and Sustaining Services
- Short-Term Post-Hospitalization Housing
- Recuperative Care (Medical Respite)
- Respite Services
- Day Habilitation Programs
- Nursing Facility Transition/Diversion to Assisted Living Facilities, such as Residential Care Facilities for Elderly and Adult Residential Facilities
- Community Transition Services/Nursing Facility Transition to a Home
- Personal Care and Homemaker Services
- Environmental Accessibility Adaptations (Home Modifications)
- Meals/Medically Tailored Meals
- Sobering Centers
- Asthma Remediation

DHCS must use its ability to provide MCPs with financial incentive payments so MCPs work with their providers to invest in the necessary delivery and systems infrastructure, build appropriate care management and Community Supports services capacity, and achieve improvements in quality performance and measurement reporting that can inform future policy decisions.

To maintain continuity of services, CalOptima will offer services currently provided under WPC and HHP during initial implementation. The four proposed Community Supports are Housing Transition Navigation Services, Housing Deposits, Housing Tenancy and Sustaining Services, and Recuperative Care. Each is explained further below.
